

Aqualyze Stream

Why choose Stream...

- ★ When you need the lowest initial and running costs
- ★ If space-saving components are key

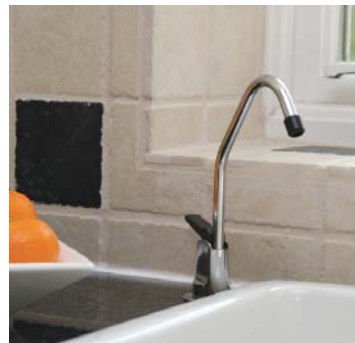

Enjoy 'bottle-tasting' water without the need for slow-filtering jugs or large space-consuming bottles... choose the Aqualyze Stream.

The simplest in home-plumbing drinking water systems with the added benefit of DIY installation.

Being of stream-lined design and consisting of minimal components, the Aqualyze Stream is the favourable choice of space-saving, under-sink filtration systems.

Because water quality varies around the country, Aqualyze Stream has a choice of 2 system options:- one for soft water areas, and another for hard water areas. Both systems remove bad taste, odour and chlorine, with the option for hard water areas having additional built-in scale control.

- Straight from the tap, great tasting water
- Step-by-step instructions for installation
- Economic to purchase and run
- Complete kit, including tap
- 1 year warranty
- Helpline available

DIY INSTALL

Filtered water is dispensed from the tap pictured.

This mini tap is included within this system, with other tap options available separately.

See reverse and separate leaflet for details.

Aqualyze Stream remover: bad taste odour chlorine scale*

Technical information

Installation

The simplicity of the Aqualyze Stream makes this system a popular choice. Installation requires no shutting-off of water supply or cutting of pipes, hence an easy DIY assembly for either yourself or your plumber. Step-by-step instructions included.

Filter Cartridge

The filter cartridge in this system requires replacing at regular intervals (see chart below for details). Cartridges are fitted with push-fitting connectors which ensures simple cartridge changeout.

Cartridge Capacity/Life:	ASF1 - 6000 litres or 6 months ASF2 - 4000 litres or 6 months
Flow:	2.8 litres/minute
Water Pressure:	Minimum - 20 psi (1.4 bar) Maximum - 125 psi (8.62 bar)
Temperature:	Filter cartridge to be installed on cold water lines only - temperatures must not exceed 100° F (37.2° C)

Aqualyze Distributor:

System components

- 1 x Aqualyze Stream filter cartridge
- 1 x Filter clip & fixing screw
- 1 x Tap with fittings kit
- 1 x Saddle valve
- 2 x Lengths of tubing (mains → filter / filter → tap)

Ordering Information

Product Codes	Description
AS1	Aqualyze Stream system for soft water areas
AS2*	Aqualyze Stream system for hard water areas
ASF1	Replacement filter for soft water area systems
ASF2*	Replacement filter for hard water area systems

UPGRADE YOUR TAP

If you would like to upgrade your system tap for a more exclusive look (above right) or even to a tap that will dispense all your water requirements hot, cold and filtered from one outlet (above left), a comprehensive range of taps are available. Request the separate 'Tap Options' leaflet for details.
