## ALDERON

## Big Switch ${ }^{\text {mim }}$ Series Float Switches

Alderon - Big Switch ${ }^{\text {TM }}$ Series Float Switches are rated at 15 amps , which allows the switches to be used on both small and large horsepower pumps.

## Alderon - Big Switch ${ }^{\text {TM }}$ Series Float Switches are

 also environmentally safe with a patented mechanical switching mechanism that eliminates the use of hazardous mercury. The high quality design utilizes a high number of fine stranded copper wires which makes for an extremely flexible - long life cable.
## Benefits

- High Amp Rating
- Environmentally Safe
- High Integrity Design

## Features

- Patented Mechanical Design
- PVC Float Housing
- Heavy Duty Cable
- Omni-Directional
- UL Listed / 3 Year Warranty

## Applications

- Normally Open (Pump Down): The Alderon - Big Switch ${ }^{\text {TM }}$ Series Float Switch turns on (closes) when the float is 45 degrees above horiztonal, turning on the pump, and turns off (opens) when the float drops 45 degrees below horizontal, turning off the pump.
- Normally Closed (Pump Up): The Alderon - Big Switch ${ }^{\text {TM }}$

Series Float Switch turns on (closes) when the float is 45 degrees below horiztonal, turning on the pump, and turns off (opens) when the float drops 45 degrees above horizontal, turning off the pump.

Note: Alderon - Big Switch ${ }^{\text {TM }}$ Series Float Switches must be used with motors that provide integral thermal overload protection.
