

**SINGLE CARTRIDGE ROUND - REGULAR 20"**

Aiding larger flow rates than the popular 10" range, 20" housings facilitate greater cartridge capacity and extend service life. With fewer change-outs required, these housings are especially useful for water treatment cartridges. To secure the cartridge and accommodate the higher flow of the 20" filter, housings are fitted with a centring plug.

**FEATURES & BENEFITS**

- Larger flow rate capacity than the 10" equivalent
- Centring plug to secure cartridge and accommodate higher flow rate
- Fewer change outs required due to additional filtration media capacity

**TECHNICAL DATA**

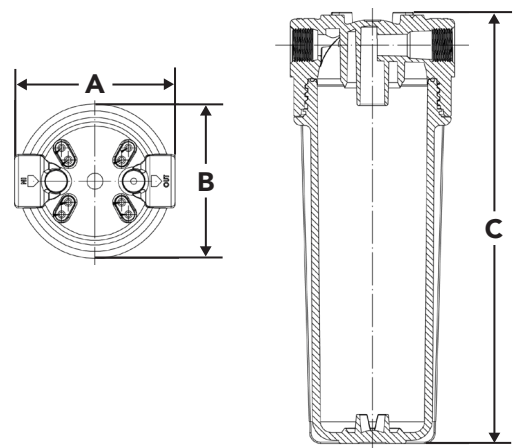

<b>Port Sizes (BSP")</b>	1/2, 3/4
<b>Cartridge Compatibility (")</b>	20
<b>End-Cap Compatibility</b>	DOE, AA
<b>Pressure Rating (bar)</b>	PK - 8.6
	SC - 6.9
<b>Temperature Rating (°C)</b>	4-40

**MATERIALS OF CONSTRUCTION**

- O-ring: EPDM
- Head: Polypropylene
- PRV: Polypropylene
- Spring: 304 Stainless Steel
- Sump-Black: PK=Polypropylene
- Sump-Clear: SC=Styrene Acrylonitrile

**ACCESSORIES**

**Brackets**

**EFH-BK**

Brackets come in single, double and triple complete with wall and head mounting screws. Made from galvanized steel and coated with a white powdered finish, which prolongs the brackets life.

**Spanners**

**EFH-SW20**

These spanners have been specifically designed to not damage the sump, which makes them invaluable for cartridge change out.

**Connectors**

**1/2" to 3/4"**

To join multiple housings together or connect inlet and outlet ports to pipework, a selection of suitable fittings are available.

**ORDERING GUIDE**

**Plastic Filter Housing**

Code	Description	Spanner	Brackets		
			Single	Double	Triple
